WORK EXPERIENCE

Mobile Developer: Leyrus - AI Chat app

May 2025

- Developed a cross-platform AI-powered chat application for iOS and Android using React Native and Expo Go, integrating the OpenAI language model for conversational functionality, AdMob for monetization, and leveraging Android Studio and Xcode for platform-specific development and deployment.
- Adapted existing software solutions to meet evolving project requirements and specifications.
- Streamlined code for optimal efficiency, improving overall app responsiveness.
- Developed new features and functionalities for mobile apps, enhancing user experience.
- Enhanced app performance by identifying and resolving software bugs and glitches.
- Prioritized tasks and completed in order of importance.

Main App Developer: Todd Teacher- Parent Monitoring System

January 2025

- Developed the Interactive Teacher-Parent Class Monitoring System as the main app developer, programmer, and web designer, using HTML and CSS for the interface, Node.js and Express for functionality, MongoDB for data management, and Electron to create a desktop application.
- Delivered customized solutions tailored to client needs, exceeding expectations in both quality and functionality.
- Optimized app performance with efficient code and regular updates for smoother functionality.

Lead Web Developer and Designer: Pinoy Pride Marketplace

January 2023

- Worked as the lead web developer and designer for an e-commerce system, using HTML and CSS to create the website's design and layout, and PHP, XAMPP, and MySQL to handle the system's functionality and database.
- Streamlined development processes for increased efficiency by implementing agile methodologies and automated testing tools.
