

Hello,
I'm Nicole

<p>I'm an entry-level web developer, I'm passionate about learning, building intuitive user experiences, and contributing to meaningful projects.</p>

Hire me

I've worked on diverse projects — Let's build something great together!

from building a cross-platform AI chat app using React Native and OpenAI, to leading the development of an e-commerce website and a teacher-parent monitoring system.

I'm detail-oriented, organized, and love solving problems. Whether it's optimizing code, fixing bugs, or designing clean UI, I thrive in collaborative environments where I can keep learning and building meaningful tech.

HTML CSS PHP JAVASCRIPT ReactJS Node.js
Express.js MongoDB Firebase Firestore Firebase
MySQL Android Studio Tailwind CSS Electron XAMPP
Xcode MySQL Expo Go Visual Studio Code

Check out some of my recent projects
